GPA 6.8/10

CERTIFICATION

Quastech software training institute
Web development

SKILLS

Javascript	CSS3
Angular	Html5
React JS	JQuery
Python	Bootstrap
Django	MySql

PROJECTS

Music player

https://pshakib.github.io/musicplayer/

I made this music player app using Html, CSS, Javascript, where a user can play a given set of musics, toggle between songs, control the volume, audio and many more. I have kept the code for this project as short as possible.

Portfolio Website

https://pshakib.github.io/myportfolio/

What better way to tell about my work and skills that my own portfolio website. Working on this project was really fun which further helped me learn new things. I have made this website with Html, CSS, Javascript and the code is completely written from scratch by myself.

Analog Clock

https://pshakib.github.io/analogclock/

A working Analog clock made using Html, CSS, Javascript which has all three: second, minute and hour hand. I have also included a digital clock for accurate time reading, City, and day of the week.

Library Management System

https://pshakib.github.io/librarysystem/

This project focuses mainly on dealing with issuing books and keeping records. The system displays all the records and activities of the members and librarians. Languages used for this project: Python, Html, CSS, Django framework.

Calculator

https://pshakib.github.io/calculatorr/

I have added this project as a mini project. This project is made using Html, CSS, Javascript which does all the basic necessary mathematical functions. It takes input value with mouse click as well as keypad number input.
